PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re Application of:	Randall A. Boudouris, et al.
Application No.:	09/990109
Filed:	November 21, 2001
For:	Magnetic Substrates, Composition and Method for Making the Same
Examiner:	John L. Goff II
Group Art Unit:	1733
Firm Docket No.:	M112.2P-10064-US01

DATE: August 7, 2006 TIME: 10:45am FACSIMILE NO.: 1-571-273-8300
TOTAL NUMBER OF PAGES (including transmittal letter): 3

FACSIMILE TRANSMITTAL LETTER

Following please find a 2 page Patent Owner's Statement of Interview; and 1 page Facsimile Transmittal Letter.

With respect to fees:

- No additional fee is believed to be required
- Charge any fee deficiency to our Deposit Account No. 22-0350

Conditional Petition

If any extension of time for the accompanying response is required or if a petition for any other matter is required, applicant requests that this be considered a petition therefore.

If any additional fees associated with this communication are required and have not otherwise been paid, please charge the additional fees to Deposit Account No. 22-0350. Please credit overpayment associated with this communication to the Deposit Account No. 22-0350.

Respectfully submitted,
VIDAS, ARRETT & STEINKRAUS

Docket No.: M112.2P-10064-US01

PATENT OWNER'S STATEMENT OF INTERVIEW

37 C.F.R. §1.560(b)

An interview was conducted on July 11, 2006 to discuss with Examiner John Goff, the response filed on May 25, 2006, and the Declarations which were filed under 37 C.F.R. §1.132 in support of patentability concurrently therewith.

Applicants and their representatives explained the substance of the response filed 5/25/2006, discussed the prior art rejection, specifically with respect to the primary reference currently of record (Texier, U.S. Patent No. 6,881,450), and their response thereto including the declarations relating to, among other considerations, commercial success. The declaration relating to surprising results, particularly with respect to claim 86, was also discussed. Attorney for Applicants, Lisa Ryan-Lindquist, also explained the declaration of Randall Boudouris filed with the previous response, concerning the viscosity limitations of the Nordson equipment disclosed by Texier, and the viscosities of Applicants' compositions as disclosed and claimed as being too high for application using the Nordson equipment disclosed by Texier.

Application No. 09/990109

Patent Owner's Statement of Interview Summary
Attorney Docket No. M112.2P-10064-US01

The examiner indicated reconsideration of the prior art rejection in view of the response including arguments, commercial success, and unexpected results would be made prior to issuing a response and applicants representative would be contacted.

No agreement was reached.

The Examiner and Lisa Ryan-Lindquist agreed to discuss the application in two weeks.

Applicants' representative, Lisa Ryan-Lindquist, conducted a follow-up interview on July 27, 2006. During this interview, Examiner John Goff indicated that the declaration relating to commercial success of Mike Nelson was found to be persuasive with respect to claim 86. He further indicated that claim 86 is allowable and an agreement was made between Lisa Ryan-Lindquist and Examiner Goff that claim 86 would be amended via Examiner's Amendment to lower range of magnetic material recited therein from about 85 wt-% to about 75 wt-% and to amend the amount of polymeric binder recited therein accordingly. The remaining claims would be amended to depend from claim 86 and where appropriate, claims would be canceled without prejudice by Examiner's Amendment.

Respectfully submitted,

VIDAS, ARRETT & STEINKRAUS
